

Recombinant human CCL3

Human CCL3

Catalog # KPG-ReHC3

CCL3 is a pro-inflammatory chemokine via recruitment and activation of polymorphonuclear leukocytes. Its receptors are CCR1, CCR4 and CCR5. The cytokine has a molecular mass each of 7.5 kilo Daltons. Recombinant human CCL3 can be intended for use in *in vivo* and *in vitro* applications. Recombinant human CCL3 is produced in E. coli BL21 transfected with the full-length sequence for the human CCL3 gene in the PET21b+.

PRODUCT INFORMATION

Content:

- 100 ng of lyophilized recombinant human CCL3

Storage and stability:

- Recombinant human CCL3 is shipped and stored at -20°C.
- Upon receipt, add 1 mL sterile distilled water and prepare aliquots of recombinant human CCL3 and store at -20°C for 12 months.

Note: Avoid repeated freeze-thaw cycles.

Quality control

- Purity greater than 98% as determined by SDS-PAGE.
- Endotoxin levels <0.1 EU/μg as determined using a kinetic chromogenic LAL assay.
- Biological activity was not tested.
- Did not Sterile. Please sterile after reconstitution using 0.22 μm filter.
- Expression system: E. coli BL21 strain
- Accession: P10147
- Protein length: Full length protein
- Animal free: Yes
- Carrier free: Yes
- Nature: Recombinant
- Predicted molecular weight: 7.5 kDa

CHARACTERISTICS

Source: Bacteria; E. coli BL21

Predicted molecular mass: ≈ 7.5 kDa (as determined by SDS-PAGE)

Formulation:

Recombinant human CCL3 needs to be sterilized by filtered from 0.22 μm filter.
Solubility: 20 μg/ml in water
