

Recombinant human TNF- α **Human tumor necrosis factor-alpha** **Catalog # KPG-ReHTNF**

TNF- α is an important inflammatory cytokine produced by macrophages prominently. This is an important cytokine to induce innate immunity against microbial infections. It also participates in the pathogenesis of infectious shock and autoimmune disorders. The cytokine has a molecular mass each of 17 kilo Daltons. Recombinant human TNF- α can be intended for use in *in vivo* and *in vitro* applications. Recombinant human TNF- α is produced in E. coli BL21 transfected with the full-length sequence for the human TNF- α gene in the PET21b+.
